

I would like to let you all know how informative it is to have XM Satellite Radio programs which allow me to travel and keep up to date. XM is a wonderful service which allows me to listen to commercial free radio anywhere in the country. I am so pleased to have a service that is tailored to my needs and not driven by big business. There is nothing on regular FM which can compare to XM as for content and variety. Please reject NAB's petition 04-160 and allow XM to continue providing the programming i am paying for.  
Thank you for your time.

David Compson
